

CG Visions Reflects Over a Year of Growth in 2015

Increasing BIM Services and integrated estimation demand contributes to CG Visions' growth rate of 414% within the last 4 years.

LAFAYETTE, Ind. -- December 8, 2015 -- CG Visions, a leader in BIM technology for residential builders, shared another year of extraordinary company growth. The increasing need and demand residential builders have for BIM technologies and integrated estimation has contributed to the company's success in providing award-winning BIM software solutions. In 2011, CG Visions was a 14-employee company, and in the last four years has experienced rapid growth to 60+ employees. CG Visions has seen a 414% growth with 46 additional employees hired over the last 4 years. Employees are experts in the building process and necessary technologies that builders rely on with expertise in Vertex BD, VisionREZ, AutoCAD, Revit, and BIM Pipeline.

"The residential building industry is starting to understand the advantages of using BIM technologies with an integrated estimation solution such as BIM Pipeline," said David Bozell, President of CG Visions. "Our experience of 15+ years in residential BIM solutions, as well as our partnerships with other market-leading software providers, is something that builders are rapidly utilizing."

The team at CG Visions assists clients in applying BIM technology to residential building businesses from custom to national production builders. CG Visions provides a variety of services such as BIM consultation, BIM plan conversion and drafting, estimation services and media services. CG Visions also offers their software solutions, which includes BIM Pipeline for estimation, eHome for on-line client experience, as well as X-RAY and QuickStart plugins for added functionality in BIM software.

CG Visions is widely recognized as a leader in the construction technology field with products and services that assist builders in adapting BIM 3-D technology. They were recognized earlier this year with a ConstructTECH Vision Award for their work with Tim O'Brien Homes. CG Visions is also consistently recognized in the ConstructTECH 50 listing as one of the most current, influential construction technology providers and listed as one of ConstructTECH's Top Residential Products in 2015.

About CG Visions

CG Visions is a technology provider for local, national, and global home builders. CG Visions is recognized as a developer of technologies which strives to assist builders to do more with less in order to make homebuilding more efficient and cost-effective. With software such as BIM Pipeline, eHome, X-RAY and QuickStart, CG Visions can help anyone from a local homebuilder to an international company implement technologies to streamline building processes.
